CUSTOMER REFERENCE GUIDE

Librett
DURABLES
 64 Main Street
 New Rochelle, NY 10801
 1-800-542-7388

ROPE DIAMETERS

THREAD SIZES

WORKING LOADS-are for rope in new condition. Working loads should be reduced where life or limb are involved. Working loads are from 8% to 14% of the tensile strength.

TENSILE STRENGTH-applies to new unused rope.

DYNAMIC LOADING-occurs when rope is subjected to sudden or extreme stress. Figures given as working loads are void if rope has been subjected to dynamic loading, high temperatures, long periods of load, improper use or storage.

IMPORTANT WARNINGS

REMEMBER: ANY PRODUCT WILL BREAK IF ABUSED, MISUSED OR OVERUSED. Any well-designed and well-built product can become hazardous in the hands of a careless user.

- Therefore:
1. Never exceed the Work Load Limit.
 2. Match components properly.
 3. Keep out from under a raised load.
 4. Avoid shock loads.
 5. Inspect products regularly.

ROPE SERVICE TIPS

- Protect rope from damage due to cutting and abrasion.
- Avoid knots when possible as they reduce the strength of a rope.
- Use splices.
- Store rope away from exposure to sun, moisture and heat.
- Do not run rope over sharp edges or around diameters that are less than eight times the diameter of the rope.
- Keep rope away from chemicals as most chemicals can be harmful to rope.

ROPE INSPECTION TIPS

Watch for:

1. Kinks and hockles.
2. Cuts, areas of abrasion, wear, fused surface yarns.
3. Excessive broken fibers and filaments.
4. Discoloration and roughness from chemical damage.
5. Brittleness and fiber weakness from exposure to UV rays.

GLOVES FOR ALL SEASONS PRICE LIST

THE RIGHT GLOVE, FOR THE RIGHT SEASON.

Customer -Friendly Librett matches superior quality gloves with a superior commitment to service. With Librett you get more than a great line of work gloves.

You get a direct line to market savvy Librett representatives who:
